Project Experience

Personal Projects

Technologies: HTML5, CSS3 and Vanilla JavaScript

- **Weather API Web App:** Built a fully responsive weather application that delivers real-time, location-based forecasts by integrating Open-Meteo for weather data and OpenStreetMap (Nominatim) for geocoding. Implemented browser geolocation, asynchronous API requests, and dynamic UI updates using JavaScript with version control managed through Git and GitHub.
- **Portfolio Website:** Developed a portfolio website to present my skills and projects. Implemented JavaScript based form validation using the DOM. Created a CV section with view and downloadable file functionality, ensuring responsiveness across all devices.

Front-end Coursework – RDR2 Video Game Website (B.Sc.)

Technologies: HTML5, CSS3, and Vanilla JavaScript

- Implemented an interactive review and comment system using DOM manipulation and event driven programming similar to YouTube style comments.
- Used JSON data structures to store, display and dynamically update user-submitted comments.
- Ensured responsive design and browser compatibility through testing and iterative improvements.

Final Year Project – Full Stack Social Networking Web Application (B.Sc.)

Technologies: HTML5, CSS3, Vanilla JavaScript, PHP, SQL, MySQL, Bootstrap

- Implemented user authentication, profile management, photo uploads, commenting and real-time chat functionality.
- Designed and integrated a MySQL database to securely store and manage user data, posts and media content.
- Improved application functionality through testing and feedback, enhancing usability and performance.

Education

- **PGDip in Computer Science**
University of Nottingham - UK

- **BSc in Software Engineering**
De Montfort University - UK

Work Experience

Web Developer (Work Placement)

K10 Computers, Leicester, UK

Feb 2017 – Feb 2017

- Built an interactive charity website for K10 Computers using HTML and Dreamweaver.
- Delivered the website within strict deadlines, showing strong management and reliability.
- Created engaging visuals to promote charitable initiatives and raise user awareness.
- Strengthened problem-solving, communication and presentation skills during a work placement.

Bartender (Part-time)

The Frame, Leicester, UK

Oct 2025 - Present

- Prepared and served a wide range of drinks, demonstrating strong product knowledge and efficiency.
- Delivered excellent customer service with clear communication and a friendly, professional approach.
- Supported daily restaurant operations by serving food, clearing tables, and assisting team members.
- Worked effectively in fast-paced environments while maintaining cleanliness and organisation.

Front-of-House Team Member & Bartender (Part-time)

The Malt Shovel, Leicester, UK

Mar 2026 – April 2026

- Developed teamwork and collaboration by coordinating with front-of-house and kitchen staff.
- Learned new tasks quickly and adapted to changing priorities under pressure.
- Built attention to detail and accuracy through managing orders and completing tasks accurately.
- Gained flexibility and multitasking skills by supporting various bar and kitchen roles.

Assembly Operative (Full-time)

Caterpillar, Desford, UK

Oct 2023 – Aug 2025

- Demonstrated communication, strong team work and problem-solving skills.
- Skilled in collaborative and independent development of digger engines.
- Adaptable learner skilled in using hand and air tools for component assembly.
- Skilled in performing repetitive tasks efficiently and safely to meet TAKT times.

Additional Information

- Knowledge of Agile software development principles developed through a final-year university project.
- Currently learning React and TypeScript.

Languages: Fluent in English, Hindi, and Gujarati.

Full UK Driving License: Clean
